

Chili Piper for CS + AM Teams

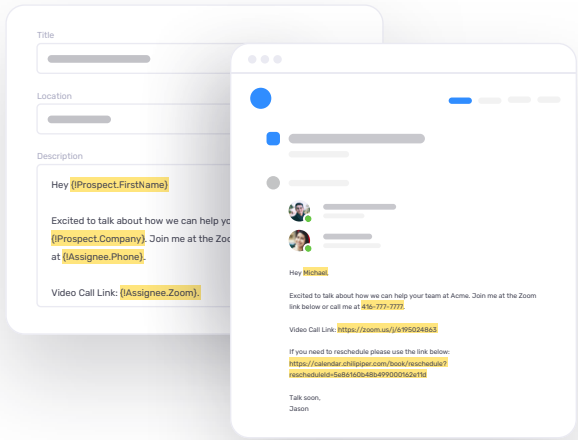

"It's like having a personal assistant to help me schedule and coordinate my calls. I'm able to save time and address client issues more quickly."

Account Manager @ Facebook

Own your schedule and save hours of admin work

With Instant Booker, CSMs and AMs schedule customer calls in seconds, control their day, and automate every associated CRM action. Something not possible with basic booking links.

Customize every interaction with unlimited meeting types

Your implementation call is not the same as your QBR. Tailor the experience for your customer while automating everything from calendar invites, email/text reminders, CRM event creation and more.

"Chili Piper was a total game changer. I manage over 100 accounts, so I book a lot of meetings. Being able to have all my different meeting types, and send customers a few suggested times over email that they can book in one click, saves me hours of having to go back and forth."

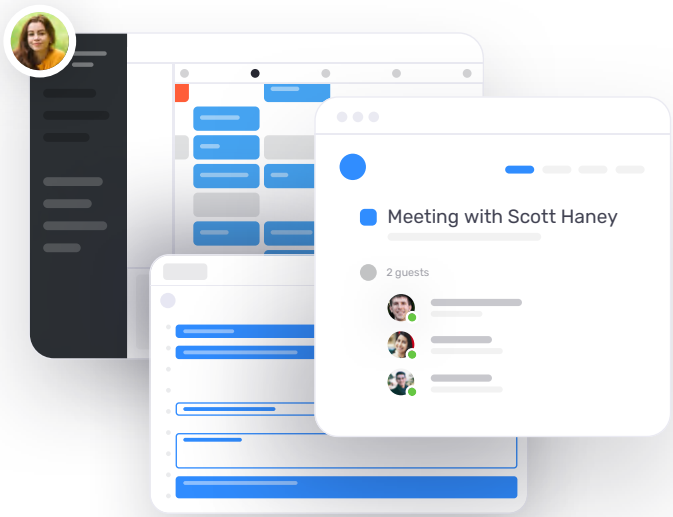

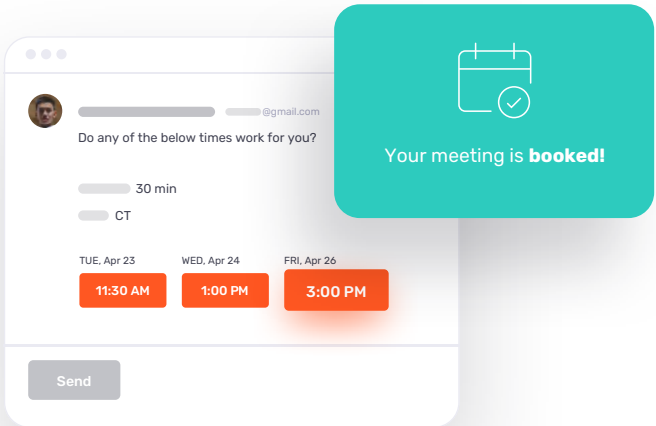

Customer Success Manager @ Conversica

Simplify customer meetings with Suggested Times

Reduce clicks and schedule customer meetings faster. Embed your availability right in your email and let customers book with one click.

"Suggested Times are just easier for everyone. It's like, "here is our availability — all you need to do is click one". I don't have to send an invite. I don't have to create a zoom link. It makes life so much easier."

Client Relations Specialist @ JBR

Stop wasting time assigning new customers

Give your customers the most seamless experience possible. Use Chili Piper's intelligent round robin and advanced routing to handle all customer handoffs.

"As an average based on CSM activity, we saw a 122% uplift in the number of meetings we were able to track in Salesforce, as these were being booked via Chili Piper and so added automatically."

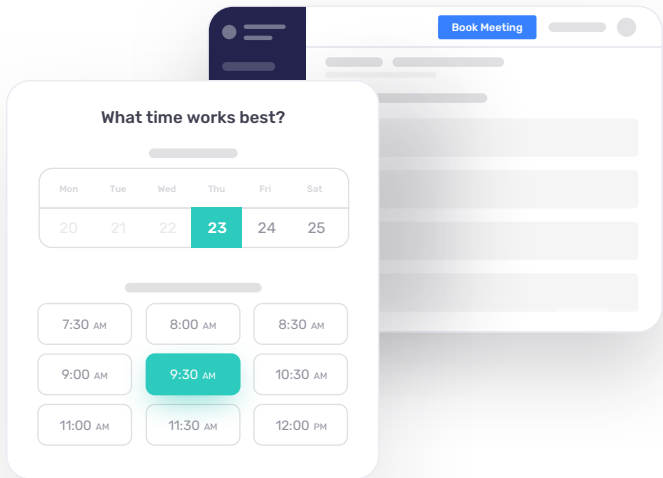

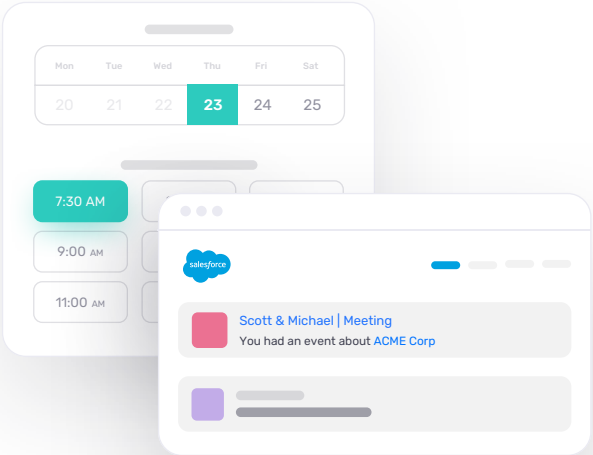

Manager, CS @ GoCardless

Spend time with your customers, not on data entry

Chili Piper automates all aspects of the meeting lifecycle from scheduling, automated reminders, CRM event creation, and more.

"Scheduling may seem like a small task, but I'm working with 30-40 deals and connecting with all kinds of people and the little tasks can add up. This helps me streamline everything and keeps my deals on track."

AM @ Airbase

Be there when your customers need you

Concierge lets your customers schedule meetings with their dedicated rep or start live calls without leaving your app -- while respecting custom availability.

"We use Chili Piper for all of our business units and just having everyone on one platform has really made our customer experience unique ... the ease of use and the consistency for the customer has been the one of the best parts."

Business Ops Administrator @ Buildertrend
